

# GemEx Engine®

## Smart Cleaning

### AT A GLANCE

Smart Cleaning is an award-winning solution for corporate cleaning optimisation within the GemEx Engine® workplace experience platform.

#### Cleaning Optimisation

- Cleaning Team App
- Configurable Alarms
- Real-Time Alerts
- Analytics & Reports
- Scheduled Tasks
- Sensor Data

### WHAT IS POSSIBLE

- This cloud-based software brings together a digital map of your premises with real-time IoT Sensor technology to digitally aid your cleaning processes and empower cleaning teams.
- Alert notifications are delivered through a dedicated app for cleaning staff.

✓ Attend

### TECH-POWERED CLEANERS

Real-time data for occupancy levels, waste bin levels, and washroom consumable are all brought together to give teams the strategic insight needed to deliver excellent service.

### BENEFITS

- 1 Predict Cleaning Patterns**  
Predict service patterns by analysing actual data for long term planning and distribution of staff time between different company sites.
- 2 Negotiate Better Contracts**  
Ensure competitive pricing throughout contract duration. Cleaning as a service contract, enabled by real-time data on cleaning hours.
- 3 Achieve Slas**  
Utilise Smart Cleanin's complete, online audit trails of data, Proof-of-Attendace and feedback for superior insight and evidenced service compliance over standard manual procedures.
